Seasonable Suggestions.

The heavy mists and cold night dews which characterize the present season are very trying to delicate organizations, and in low-lying and swampy localities they produce an enormous crop of intermittent fevers of various types and degrees of in tensity. At this very time there are probably half a million of people in the Uniter States suffering from peniodical fevers by missmatic logs and exhalations. masmatic logs and exhalations. What makes the prevalance of this evil the more deplorable is the fact that it might in all cases be easily prevented. Maiara and damp produce little or no effect upon the system pre-fortified by a course of Hostetter's Stomach Bitters. Every fall and spring bundred of letters are received from persons residing in lever and ware districts. persons residing in fever and ague districts who state that while their neighbors are who sate that while their neighbors are incapacitated for labor by that debilitating disease, they have been happly exempted from attack by the regular use of the great vegetable antidote to miasma, As a chlologopic or specific for intermittent and remittent fevers the Bitters may tent and remittent fevers the Bitters may be justly accounted infallible. They eradicate the complaints in their most obstinate forms; but the wiser course is to forestall attack by taking the preparation as a preventive. The amount of productive labor withdrawn from active service during several months in the year by malrious maladies is immense, and the new during several montais in the year by mat-rious maladies is immense, and the pe-cuniary losses to individuals, families, and the nation from this cause is incalculable. Bear in mind that by toning and regula-ting the system with Hostetter's Bitters westerly winds in the creasing pressure and southwesterly to northwesterly winds, with cloudy but dearing weather. In the northwest and thence to Kentucky and Tennessee, northwesterly winds, clearing and cool weather. Warning signals continue at Chicago, Milwankee and Grand Haven.

This Company, managed on Principles of Strict concentry, other was the concentration of the Presentations, consistent with safety, and lower, we believe, than any other Company doing business in the State. Its success is an established fact. All reserve from prominums, as a security to the policy holders, additional to the capital stock, is invested by the Local Boards, within this locality from which it is derived.

Being convinced by their knowledge of the integrity and prudeness of the gentlemen who compose its liprectory, and by a thorough examination of its pikin of organization, that it is in every respect a reliable dompany, the subscribed citizens of Wheeling, who have themselves subscribed to its stock, and organized as a Local Section of the took, and organized as a Local Section of the State.
